OUR PUBLICATIONS

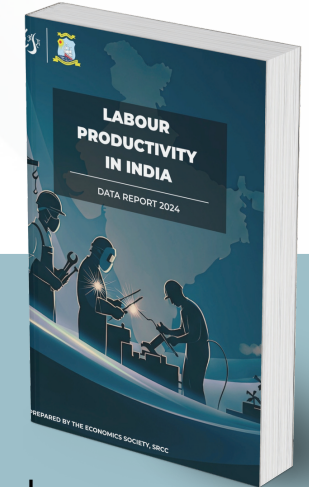

The Fiscal Index

This report worked on an analysis of the Fiscal Index of Indian States. It covered 28 states across three major domains: Economic strength, Fiscal health, and Fiscal inclusion. The report evaluates government's financial spending by analysing 19 parameters over a 10-year and 5-year time period. What sets this report apart from other reports is our emphasis on Fiscal Inclusion, which covers initiatives towards the growth of marginalised groups, enabling a deeper understanding of the financial spending at the grassroots level.

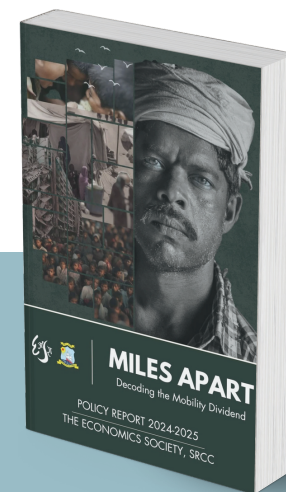

Labour Productivity Index

This report takes a closer look at how labour productivity differs across India's states, exploring the regional and sectoral trends highlighted in key studies. It draws on eight major sources and considers more than seven key factors like health, education, infrastructure, innovation (through NITI Aayog's Innovation Index), capital investment, sectoral shifts, and cultural influences. The goal is to understand what's really driving productivity growth and why some states are pulling ahead while others lag.

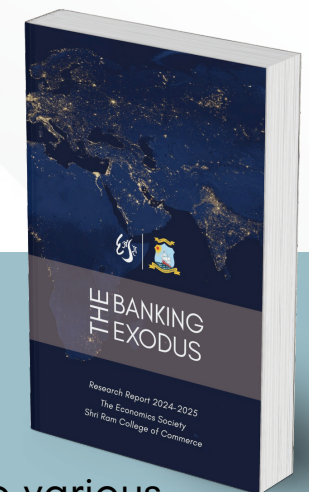

Miles Apart: Decoding The Mobility Dividend

"Miles Apart: Decoding the Mobility Dividend" explores India's role as both a destination and source of migration. It traces the nation's journey from the Mughal era to the Partition and analyses migration patterns from Pakistan, Bangladesh, Sri Lanka, Myanmar, Nepal, Bhutan, and Tibet. The report highlights the gaps in India's immigration policies and calls for a comprehensive strategy that safeguards national security while recognising the contributions of migrants towards the country.

The Banking Exodus

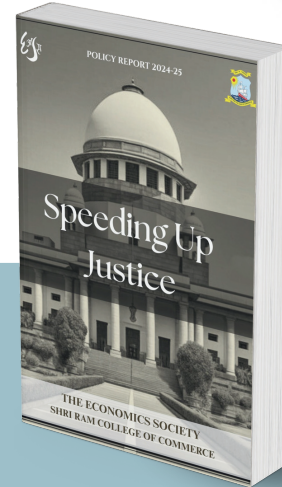

'The Banking Exodus' is a journey of SWIFT's evolution, from its inception in 1973 to undergoing multiple advancements, making it the industry standard of international financial messaging. The report examines the various challenges faced by it including cybersecurity risks, cost and speed, etc. Further, alternatives like CIPS, SPFS, blockchain systems, CBDCs are discussed. The report evaluates SWIFT's claim of neutrality and its inadequacies in the same, highlighting the western dominance and covering intriguing cases.

OUR PUBLICATIONS

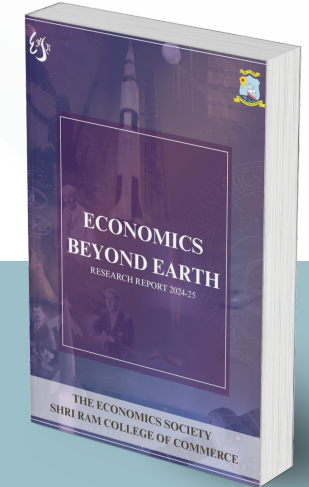

Speeding Up the Justice System

'Speeding Up the Justice System,' critically examines the structural and operational challenges facing India's judiciary. It explores resistance to judicial reforms and infrastructural constraints that hinder timely justice delivery. Through data-driven analysis and case studies, it highlights the urgent need for systemic improvements in transparency, accountability, and technological integration. It aims to present practical interventions that can help expedite court processes while preserving the judiciary's independence and integrity.

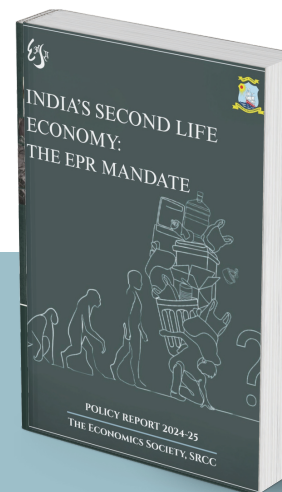

Economics Beyond Earth

This report on Space Economics examines the sector's evolution, origins of space exploration, economic contributions, and its growing impact on global development. It discusses key players, the rise of India's space program, PPP models, international collaborations, and the role of AI and automation. Areas such as satellite communication, space tourism, and interplanetary trade are explored. It also features a mathematical model and Excel simulation valuing extraterrestrial beings across three intelligence levels.

India's Second Life Economy: The EPR Mandate

The EPR (extended producer responsibility) analyses how economic growth is directly proportional to waste generation- including E-Waste, Battery Waste, Plastic, hazardous waste across India, EU and America which often outpace the development of robust EPR. By examining existing frameworks and data trends, we identify gaps and propose integrative solutions, drawing inspiration from initiatives like the European Green Deal to strengthen global EPR strategies and promote sustainable waste management.

The Algorithm of Anarchy

The report explores how technological advancements over the years have transformed the nature of crime, impacting its volatility. It also delves deeper into unemployment trends and their relation to increasing crime rates. It explores the use of AI in predictive policing and analysis. Furthermore, the case studies undertaken on the Ethereum DAO Hack (2016) and the Mother Of All Breaches (MOAB) highlight real-world implications, offering insights into emerging security challenges.

DASHBOARDS

THE BLUE ECONOMY INDEX

The Blue Economy Index is a comprehensive initiative by The Economics Society, SRCC. Extending its coverage over 9 states which have sufficient access to the Blue Economy. and compares and visualises key indicators to assess the performance, opportunities, and challenges within India's Blue Economy sectors. Backed by robust secondary research and data analysis, it presents a state-wise comparison, enabling deeper insights into fisheries, hydrocarbon and coastal livelihoods, sustainable practices, identifying underperforming sub-sectors of the blue economy.

THE FINANCIAL INCLUSION INDEX

Financial Inclusion is one of the most important prerequisites for sustained and inclusive economic growth. The Financial Inclusion Index aims to develop a state-wise index of financial inclusion over a time period of 11 years from 2013 to 2023. On the basis of data taken from various government sources, 28 Indian states have been ranked and scored on the basis of 11 parameters. In addition to this, a dashboard with insightful visualisations has been prepared.

PROJECT JAANKARI

Project Jaankari is dedicated to primary data collection through on-ground surveys. Under the project, we aim to gauge the sentiment of people on Government Initiatives and the data collected from the survey is analysed to generate insights and draw policy recommendations. This year's analysis was based on the Performance Evaluation of Jan Ausadhi Kendras.

LIVE PROJECTS

30+

articles reviewed

150+

research hours

5+

reports reviewed

We undertook a live project, in collaboration with the Tata Energy and Resources Institute (TERI), to evaluate India's financing needs to achieve its Net Zero targets by 2047 and 2070. The project involved estimating long-term investment requirements across key renewable energy sectors like solar, wind, hydro, nuclear, and battery storage. In addition, we also designed a financial model that balanced financing through debt, equity, carbon markets, and Infrastructure Investment Trusts. Our recommendations included policy suggestions that can be implemented to streamline investment planning and move faster towards the Net Zero targets.

The Energy and Resources Institute
(TERI)

United Nations Development Programme (UNDP)

For our live project under the United Nations Development Programme, we are providing solutions to support their efforts under Project Utthaan. Project Utthaan, in collaboration with urban local bodies, supports the inclusion of Safai Saathis by enabling access to social protection schemes, financial services, and dignified livelihoods. The team has worked upon various problems faced including research on barriers towards formalisation, effects of taxation policies and value chain addition in the informal waste sector. To support on-ground workers, the team has developed an Excel model in 10 languages, compiling welfare schemes and eligibility criteria. It helps guide Safai Saathis in remote areas without internet access.

The live project is being undertaken by The Economics Society, SRCC in collaboration with ICARS (Integrated Centre for Adaptation, Disaster Risk Resilience and Sustainability), a joint centre established at the Greater Noida Centre of IIT Roorkee. The project has been divided into two sub-teams: Climate Finance and Disaster Finance. Each team is preparing a comprehensive report that explores the broader intricacies of their respective themes while also analysing potential challenges and future implications. These reports aim to broaden the scope of research in these futuristic topics while also giving a fresh perspective.

***Integrated Centre for Adaptation,
Disaster Risk Resilience and
Sustainability (ICARS)***

IGC

International Growth Centre (IGC)

The IGC (International Growth Centre) Live Project, in collaboration with Ideas for India (I4I), focused on the theme of nutrition and its role in India's development. As part of the project, participants conducted in-depth research by analysing a wide range of articles published on the I4I platform to identify key insights, patterns, and gaps related to nutritional outcomes in the country. Based on this research, the team proposed potential synthesis article ideas aimed at addressing pressing issues within the nutrition landscape. The project helped build critical research and analytical skills, with the eventual goal of authoring evidence-based articles that contribute to the policy dialogue around nutrition in India.

UNCOINED

In-house Podcast

Uncoined is the in-house **international podcast** of The Economics Society, curated and hosted by its students. It delves into thought-provoking conversations that span a broad spectrum of ideas, **ranging from economics and history** to political science, geopolitics, and beyond. Through **engaging discussions** and diverse perspectives, Uncoined aims to challenge conventional thinking, spark meaningful dialogue, and empower young minds to critically engage with the world around them.

PROFESSOR JAGDISH BHAGWATI RESEARCH SCHOLARSHIP

The Professor Jagdish Bhagwati Research Scholarship aims to foster research among B.A. (Hons.) Economics and B.Com. (Hons.) students at Shri Ram College of Commerce, University of Delhi. It incentivises students to engage in quality-driven research on themes related to economics, commerce, and policy.

Aim

To motivate students to invest time and effort in **research and quality-driven pursuit of knowledge.**

No. of Registrations

Two scholarships will be awarded, either to teams or individual students.

Cash Prize

Each scholarship is worth **Rs. 25,000, totaling Rs. 50,000.**

ELIGIBILITY

Second-year undergraduate students of Shri Ram College of Commerce.

CHAI PE CHARCHA

"Chai Ek, Vichar Anek"

Chai Pe Charcha, an initiative by The Economics Society, presents a novel way of disseminating research and information by fostering engaging and informal discussions over a cup of tea, welcoming participation from all interested individuals. Held in a casual yet intellectually stimulating environment, these gatherings brought together over 200 participants to engage in conversations spanning a wide range of topics from geopolitical issues to discussions on job security and evolving skill sets.

WRITING MENTORSHIP PROGRAMME

Editorial Initiatives

The **Writing Mentorship Programme**, aims to teach students of 11th and 12th from diverse backgrounds the basics of writing and research, helping them develop these skills for their academic and personal growth. This year, the programme witnessed 1500+ registrations across 450+ schools, mentoring 105 students. Over 80 articles were received, and 10 enriching sessions were conducted on writing, research, and data analysis. Notable guest lectures were delivered by Bornali Bhandari (Professor at NCAER) and Ms. Sunalini Mathew (Journalist at The Hindu), with The Hindu and The Quint as knowledge partners. The initiative continues to empower young minds by fostering critical thinking and effective communication.

NATIONAL ECONOMICS OLYMPIAD 2024

The National Economics Olympiad, which is the biggest Economics Olympiad in India, hosted by The Economics Society at SRCC, aims to restructure the routine nature of standard curricula for students in Classes 11 & 12 by unlocking their true potential in the field of Economics.

The 7th edition - National Economics Olympiad 2024 aimed at helping school children break the monotony of an unquestioned curriculum and realise the full potential of the discipline of Economics. The Olympiad helped high school students "Discover the economist in them."

Additionally, the Olympiad aims to provide students with an opportunity to challenge their reasoning and aptitude skills, get exposure to the format of competitive exams like CUET, and establish a strong foundation in economics.

SRES 2025

Bigger. Better. Bolder

Organised by the esteemed Economics Society of SRCC, the Shri Ram Economics Summit stands as Asia's Largest Undergraduate Economics Summit. Held annually, this prestigious event brings together bright young minds to tackle the most pressing issues of our time. The Summit goes beyond simply analysing current economic realities; it fosters a space for fresh perspectives and innovative solutions.

SPEAKER SESSIONS

Riveting insights from industry leaders and top government officials.

4 CASE COMPETITIONS

4 Pan-India competitions focusing on research, policy and data.

COMMENTS

““

One of the most energetic and lively member of ecosoc.

Aniruddh to Shashank

““

I love Kulpreet. She’s super hardworking, full of life, and puts her heart into everything she does.

Snehil to Kulpreet

““

Great mix of fun and work, really someone who will try and keep a team and its atmosphere active.

Manan on Madhav

““

Looks like a 8th grade kid whos locked in, only vegetarian bengali I know.

Shivansh to Vedansh

““

Nice. A Reminder of Divyanshu.

Swadhruth to Shivansh

““

Prakhar is an amazing person to be around, he always made a joke of himself to cheer others around him up. A revolutionary individual indeed!

Gunn to Prakhar

““

Nice and hardworking kid

Ujjwal to Swastik

““

Pradeep brings a perfect blend of fun and professionalism to the team – always a pleasure to work with!

Shubham to Pradeep

““

Kriti is the cutest to work with. I have always admired her work and interacted with her informally. She always takes 'Kriticism' well. I also remember that her favourite cake flavour is Coffee.

Samyak to Kriti

““

The wildest personality, the fun of the party. Conquonomics would not have been the same without her video notes.

Diksha to Shreeya

““

Hardworking and immensely entertaining, a joy to talk to and a bit of a comical walker.

Aroma to Aayati

““

Anvi is a hardworking and genuine person, JK6's greatest find! Just needs to charge her phone more often :)

Swastik to Anvi

COMMENTS

“

She has a very warm personality and cares a lot for her juniors. She has been the one person in this Society on whom I can count on whenever I am facing a problem regarding anything in life.

Rwitoban to Ananya

“

Vidisha is my hamburger queen with the cheesiest pickup lines, deadpan expressions and crazy good humour. Hope her bunny smile stays on forever <3

Ananya to Vidisha

“

Travel partner, one of the smartest and busiest people in EcoSoc I know, also knows all the gossip happening somehow. Couldn't have done my tenure without her

Priyal to Suhani

“

"Damak. Rhymes with Chamak", and he truly lives up to it. Always the approachable good cop, he is that gentle voice in any storm that quietly lifts the whole team.

Jahnvi to Damak

“

Working under Samyak was a masterclass in patience- mine, not his. Still, between the never ending edits and scoldings, I somehow learnt a lot. Still not over the trauma, but a very solid (and one of the best) senior indeed.

Maitri to Samyak

“

Ikshit is very fun person to work with, he'll make sure that you are not bored while working and keeps on entertaining people. He's hardworking and I really liked working with him.

Amishi to Ikshit

“

Knowing Stuti from day 1, she is the most reliable person in terms of getting the work done and always being there for you when you need her, but please don't trust her with any of your possessions. She will definitely, and I mean most definitely, lose it.

Pranjali to Stuti

“

Shuhul is a pretty fun person and from what I've seen, a good team player. I believe people like working with him because of his easygoing personality and ability to crack jokes unintentionally.

Kriti to Shuhul

“

Pranjali is a very sick, sleepy, and tired girl. However, what she lacks in strength, she makes up for with her gigantic heart. She's a genuinely kind and emotionally intelligent person. Also, she's funny (only sometimes).

Shiren to Pranjali

“

Advika brings a calm and polite presence to the team. While she's quite introverted, she's reliable and contributes to work in her own way, with thoughtfulness and care. It has been interesting working with her, and I appreciate her steady demeanour and the sense of balance it brings to the team.

Kulpreet to Advika

“

Knowing Jahnvi has been an absolute pleasure :) Even though we shared only one common team, I can attest to the fact that she's a supremely charismatic person, a very efficient worker and a thoughtful human being!

Mishthi to Jahnvi

“

Extremely fun while passionate—a deadly combo. One of the hardest-working, most motivating, and enthusiastic people to work with. Lucky to have been paired with her in so many teams.

Vishnu to Maitri

COMMENTS

“

Right from asking Gunn "Ye aniruddh kon hai humaari team mei" to being the first junior in my phone with an emoji in his contact, dancing with him, his signature seat at abongza, beating me at asphalt twice at nexus, my ecosoc tenure would have been incomplete without Mr Saharanpur's rants. Literally the best card monitor :)

Tanya to Aniruddh

“

From Day 1 of DataReport 1, Divleen has been my favourite teammate;always dependable, always there. Whether it's crying over Excel formulas, figuring out graphs,constantly formatting the sheets or just needing a good gossip session post-meeting, she's the one we all turn to. Her dedication to the team(and to data)is unmatched, and her presence makes even the most hectic moments a little lighter and a lot more fun. DR1 is incomplete without her.

Anshika to Divleen

“

Anavi is one of the most hardworking people I know (to the point where she was doing EcoSoc work even when we were all panicking about the war situation surrounding us). She's straightforward, sensible, and kind. Overall an amazing human being, she quickly became my go-to person. I'm proud to call her one of my best friends.

Stuti to Anavi

“

Working with Keshav has been an absolute pleasure. I can confidently say he is incredibly hardworking, diligent, and capable. I have seen his dedication, how consistently he goes the extra mile to ensure things are done right, and how he never hesitates to help out others. His positive attitude makes working together truly enjoyable, and he genuinely motivates everyone around him to do better.

Harshit to Keshav

“

A mix of Shanaya's (SOTY) glam, Aisha's sass, Rani Mehra's (Queen) growth arc and Geet's unstoppable energy - Tanya is the Bollywood multiverse packed into one beautiful human. At one glance, she gives off such girl-boss "don't mess up or else I'll..." energy, but then you meet the sweetest, funniest human who always shows up (often with food in one hand). She will scare you enough to be productive and even inspire you. Tanya can hold the entire team together from work to memes and emotional breakdowns at 3 a.m. I wish to be like you in the future :)

Aarna to Tanya

“

Siya worked with clarity and calm, always there when the team needed her.

Daivik to Siya

“

Shiren is your go-to person when in a crisis, when you need a boost of motivation or you simply need an out of the box idea to enhance your work quality. A go-getter in the truest sense and an asset to any team she'll ever be in, it was an absolute delight working with her.

Suhani to Shiren

“

He is a nice dude.

Shreeya to Shubham

COMMENTS

“

She has a very warm personality and cares a lot for her juniors. She has been the one person in this Society on whom I can count on whenever I am facing a problem regarding anything in life.

Rwitoban to Ananya

“

Aditya is a really smart guy who’s also fun to work with. Someone who just gets the work done.

Aayush to Aditya

“

Vidisha is my hamburger queen with the cheesiest pickup lines, deadpan expressions and crazy good humour. Hope her bunny smile stays on forever <3

Ananya to Vidisha

“

Khushi has been a very fun person to have around, really brings the life to her teams along with responsibility!

Damak to Khushi

“

Working with Aayush has been a great experience. The part I would appreciate the most is his positive attitude and support whenever we collaborated while working.

Siya to Aayush

“

Manjari is very sweet, hardworking and fun to work around. She has a positive energy which makes work and in general an experience with her, more exciting.

Vedansh to Manjari

“

Vardaan has been fun to work with. He looks for the easiest way to bring out innovative ideas. He has done great at volunteering for most initiatives possible.

Advika to Vardaan

“

In my opinion, Ready is the most straightforward, non-problematic and nonchalant personality that I have come across in the society. He is one of my closest friends in the society, and the person who made Vyapar a memorable memory .

Prakhar to Swadhruth

“

Working with her has been.....an experience. An experience filled with relentless teasing, merciless bullying, and the kind of scolding that would put a school principal to shame. But beneath that terrifying exterior (and wicked sense of humour) lies someone with a heart of gold.

Aditya to Gunn

“

She is one of the most dedicated and focused individuals I’ve had the chance to work with. Her commitment is evident in everything she does. She is incredibly talented, and her kindness and maturity set her apart.

Shuhul to Pratika

“

He is among the sweetest seniors I have ever met. He is calm, sharp, considerate, and always there for us. He seemed more like a team member than the team leader, showed us support as a teammate.

Pratika to Aman

“

Extremely hardworking, crazy smart, super fun to be around, top of the line Canva skills :) Probably has all the lore of the entire batch.

Yavisht to Aarna

COMMENTS

““

Shiren is a balanced individual. Fun and chill to work with while being serious as well. Shiren is a good friend too.

Shreeya to Shiren

““

Aroma Mall is the embodiment of joy. With her witty humour and bright smile, she is the light of the room always. She talks about growth but fails to realise sometimes that she is the an inspiration for many.

Aayati to Aroma

““

Punya is quite literally a ray of sunshine. Used to be slightly intimidated of her initially but realised she’s genuinely one of the funniest and nicest people to be around. Certified cutie with great outfits; 10/10 would recommend :)

Vidisha to Punya

““

If the Chill Guy were human, he would be Ujjwal. The only reason he would be disappointed in you are if your work isn't done or if you have a low alcohol tolerance. He is fun, easy to approach, and always happy. He might say ki "Kaise Noob Bacche Leliye", but is always ready to play among us with us :)

Divleen to Ujjwal

““

Anshika is honestly one of the sweetest people I have met; incredibly hardworking and easy-going. Whether the time when we were stuck late in traffic or were being pushed in the metro, all while having silly conversations, it was fun.

Manjari to Anshika

““

Manan is one person I thought I could never talk to because he always seemed like a nonchalant, zero-drama kind of guy. But over the last year, he's proven that he is more than he lets on. He is extremely responsible towards his work.

Ritul to Manan

““

Snehil is a very hardworking person. She doesn’t show it but she gives her best when asked without complaining. EcoSoc would’ve been harder for me if she weren’t there.

Pradeep to Snehil

““

I am jealous of Siya because her ability to seem nonchalant, unbothered and relaxed irregardless of the situation at hand is a superpower I wish to have.

Aman to Siya

““

She is one of the good friends I made here, all thanks to me volunteering for a third team at SRES and ending up in collabs. Sweetest, cutest person in Ecosoc, and always up for jamming sessions during ‘gedi’.

Khushi to Amishi

““

She is the sweetest one in the soc. Privileged to have a senior like her. Edlv treats at Bistro, sponsored by her, gotta be the greatest thing ever for EDLV honhaar juniors.

Keshav to Ritul

““

Incredibly hard-working person and one of the nicest people I have come across in college. A complete paradox. Will go on random rants about the nerdiest shit ever but will be the best listener when needed. On one side, gets 9.8 gpa, on the other, bro's lowkey an alcoholic..

Deep to Rwitoban

““

Post goat woyee

Shashank to Deep

COMMENTS

“
Having had the privilege of knowing Daivik as both my hostel mate and EcoSoc buddy, I can confidently say he is one of the most vibrant and fun personalities I've had the pleasure of being around.
Ikshit to Daivik

“
10/10. Someone I truly admire and look up to. She's also the best person to try out new coffee shops with!
Anavi to Priyal

“
Mishthi is one of the sweetest and hardest-working people I have had the opportunity to work with. From the time of my interview to having her across almost all my teams, she has been a source of help always. It has truly been a pleasure working alongside someone as composed and dependable as her.
Anvi to Mishthi

“
Yavisht was the 1st junior I ever met and I never thought that he'd make it to EcoSoc (Just kidding; bro got through what I can only call one of the hardest recruitment interviews). Super funny and the perfect person to be around when you're panicking over the speaker setup having the wrong flowers :)
Punya to Yavisht

“
Harshit approaches every task with clarity, focus and contributes insightful ideas. His analytical mindset and consistent dedication make him an invaluable teammate.
Vardaan to Harshit

“
Shiren is a balanced individual. Fun and chill to work with while being serious as well. Shiren is a good friend too.
Shreeya to Shiren

THANK YOU
